

LA TERRAZZA

Authentic Italian Terrazzo.
Designed in California. Made in Italy.
sonomatilemakers.com

Tile is an inherently sustainable choice because it can last a lifetime, produces no VOC off-gassing and is a non-leaching product that does not adversely affect other materials or humans that come in contact with it. All of our product lines, produced both in the US and by our global partners are made in factories that share our passion and sense of responsibility to care for the environment and produce products in the most sustainable way possible.

La Terrazza Specifics:

- Contains 16% - 85% pre-consumer recycled content (see next page for color chart)
- Lead-Free
- Non-Toxic
- No VOC off-gassing

Around the La Terrazza Factory:

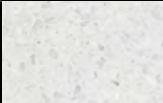

- A photovoltaic system is used to produce energy. Around 7% of the total energy for the factory is produced using this.
- Water used for cutting is recycled. The water is strained through filter-press systems, then clean water is returned for use in the factory.
- Supplier of raw materials uses sustainable business practices in the extraction and processing of said materials.
- Waste is recycled and used in road construction
